## DETAILED ACTION

### *Response to Amendment*

1. This action is responsive to an amendment filed on 01/18/2007. Claims 7-10 are pending. Claims 1-6 and 11 have been previously cancelled.

### *Response to Arguments*

2. Applicant's arguments mailed on 01/18/2007 Remarks have been considered but are moot in view of the new ground(s) of rejection which is deemed appropriate to address all of the needs at this time.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.

Art Unit: 2614

3. Resolving the level of ordinary skill in the pertinent art.
  4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
6. Claims 7-10 are rejected as best understood in light of the 112, first paragraph problem under 35 U.S.C. 103(a) as being unpatentable over Beerman, Jr. et al. (U.S. 6,084,952) in view of Parry (U.S. 7,002,703).

Regarding claims 7, 8 and 10, with respect to fig.1,2,4,5, Beerman teaches a system including a user operable PDA [i.e., portable radio communication device] (col.6, line 28) and an object device connected to a network, the portable radio communication device comprising:

a transmitter for transmitting a identity tag indicative of the identity of the portable radio communication device) (fig.4; col.9, lines 25-31).

the messaging server [i.e., object device] comprising a receiver, and a processor (fig.3, item 80). (Note: receiver is inherent in the messaging server)

Art Unit: 2614

in response to the receiver receiving an identity tag transmitted from a portable radio communication device, the processor being configured to use the identity tag to obtain address information via the network and authorize the distribution of information via the network to recipients' device [i.e., remote server or terminal] identified by the address information associated with the identity tag (col.12, lines 42-45, col.13, lines 1-7).

However, Beerman does not specifically teach processor downloading of information. Parry teaches processor downloading of information (col.11, lines 55-67). Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Beerman to incorporate processor downloading of information in order to provide particular downloaded data to a particular device.

Regarding claim 9, Beerman teaches that the portable radio communication device is inherently a passive device (fig.2).

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
